INDIVIDUAL AND EXCLUSIVE

REALIZE CUSTOMER REQUESTS

Everything is possible. Modern living, effective presentation at trade fairs and comfortable working environments are boundlessly individual.

Pure, glamorous or vintage - important are only style, design and creativity. Besides furniture and accessories an exclusive floor design is a key part of a room, that can create a special ambience in an apartment, a home, a trade fair stand or commercial areas. With the diversity of the collections and individualization possibilities Falquon floor makes every room come to life.

You want more? FALQUON offers you more! More quality, more variety, more creativity, more design and more comfort.

FALQUON offers something innovating and unique: our lacquered surfaces are solely produced with electronic beam hardened surfaces. This modern „EBC-Technology“ allows us to absolutely abstain from solvents. Your advantage: Surfaces, which fulfill the highest demands of resistance, exclusivity and healthy living while being easy on the environment.

WOOD

THE COMFORTABLE

The natural look of selected wood designs is boosted by the luminous effect of the high gloss surface. Perfect for living areas and light to medium use commercial areas.

The collection contains trendy decors as well as a classical design. Because of the high gloss surface, each pattern has an even higher contrast and achieves a deep colour at the same time.

MAX

THE SUCESSFUL PRODUCT

A unique format has been created. Due to less joints the surface appears in a very smooth look. Incredible quick and easy installation. By the way: MAX can be combined with our Quadro series.

For modern living areas design, commercial interior equipment, retail, or catering trade. Great colour effects with unique gloss suit modern as well as classical interior.

THE FLOOR

WATERPROOF + MINERAL

The latest generation of design floors. The new developed mineral based and formaldehyde-free substrate e.marble® is considered the new generation of floor coverings. Made of engineered and finely ground marble THE FLOOR contains all the requirements of an all in one product.

All decors from this product group can be found in the separate catalog such as on www.falquon.de or www.the-floor.eu

STONE/UNI

Panel size 1500 x 200 x 6 mm

HERRINGBONE

Surface wood structure
Panel size 740 x 148 x 6 mm

THE WALL

THE INNOVATIVE WALL TILE

Because of the 100% waterproof support plate THE WALL can also be used for wet rooms such as a bathroom or toilet and even in the shower area (when installed in the shower or areas with direct water contact, the tongue and groove connection must be sealed with silicone). The panels are equipped with groove and spring and thus self-aligning. THE WALL is cut to size with a cutter knife, which enables a quiet and, above all, dust-free installation. Thanks to the UV-resistant surface, THE WALL can also be used in conservatories or in rooms with a high exposure to sunlight.

For a perfect result, we offer suitable aluminium profiles in our range of accessories:

- Adhesive
- End strip usable on the right and left
- Corners inside
- Corners outside
- Final profile ground

The aluminum elements can either be screwed or glued to the wall.

All decors from this product group can be found in the separate brochure or on www.falquon.de

Surface

Supermatt (MT), Highgloss (HG)

ELECTRONIC-BEAM-CURING (EBC)

HIGH TECHNOLOGY IN LACQUER DRYING

Unsaturated acrylic lacquers can be cured by UV light or electron beams. Electron-beam-curing is a considerably more elaborate procedure but offers following advantages:

Qualitative Advantages

The process of curing lacquer with electron beams builds highly cross-linked macromolecules. These are mechanically as well as chemically extremely stable. On this basis the floors withstand the highest impacts in scratch and chemical resistance. The flooring therefore combines discernible comfort and an exclusive look with a high quality product for varied areas of use.

Ecological Advantages

Modern production techniques ensure we meet the highest level of process security and quality. The resource friendly selection of materials and their use underlines the environmentally friendly and non-irritating nature of our products. The emission neutral production process makes an active contribution to climate protection, as the environment is not burdened through the production process.

ADVANTAGES OF AN EBC FINISH

IN COMPARISON TO MELAMINE AND UV COATED SURFACES

Characteristic	EBC coating	UV coating	melamine coating
Comfort/Bare foot feel	■ soft, warm	■ soft, warm	■ cold
Chemical resistance	■ very high	■ high	■ high
Scratch resistance	■ very high	■ high	■ high
Micro-scratch resistance	■ very high	■ high	■ high
Degree of gloss (High gloss)	■ many levels of gloss	■ difficult	■ complicated
UV resistance (Colourfast under direct sunlight))	■ very high	■ high	■ low
Brittleness (Risk of splintering under impact))	■ very low	■ low	■ high
Cross-linking (Necessary for a permanent finish)	■ complete	■ not complete	■ not applicable

Besides their perfect look, all Falquon collections convince with an electronic beam finish and selected authentic surfaces.
